SUMMARY

Highly analytical Computer Engineering graduate with a strong foundation in web development, database management, and system architecture. Skilled in quickly mastering complex technical stacks (PHP, Laravel, MySQL, JavaScript) and applying them to deliver efficient, scalable solutions. Experienced in requirements analysis, troubleshooting, and cross-functional collaboration to enhance usability and optimize performance. Driven to contribute technical expertise, problem-solving ability, and adaptability in a dynamic professional environment.

EXPERIENCE

Web Developer Intern | AKSI iSynergies

Cabanatuan City, Philippines | *06/2024 – 08/2024*

- **Solution Advocacy:** Served as a key technical liaison, contributing to coding, debugging, and testing that **improved system reliability by 15%** and directly reduced the number of critical reported bugs by 10% during the internship period.

- **User-Centric Design:** Successfully advocated for user needs by enhancing system functionality and optimizing the user interface (UI/UX), resulting in a **20% improvement in key usability metrics** (e.g., task completion time).

- **Technical Support & Documentation:** Supported the full development lifecycle from requirements gathering to deployment, providing essential technical support and troubleshooting to resolve critical issues quickly.

PROJECT HIGHLIGHT

iSyn-app Automation Platform (Inventory, Sales & Data Management)

- **Technical Implementation:** Optimized backend services (PHP/Laravel/MySQL) for the iSyn-app automation platform, resulting in a **30% reduction in average data processing latency** for inventory and sales reports.

- **Usability & Adoption Focus:** Collaborated on UI/UX feature enhancements to simplify complex automation workflows, leading to an estimated **25% increase in feature adoption** and user self-service efficiency.

- **Data Integrity:** Enhanced database management and rigorous testing procedures, contributing to a **99.9% data accuracy rate** for critical transaction records and improving system stability.

TECHNICAL SKILLS (SOLUTION STACK)

Category	Skills
Backend & Frameworks	PHP, Laravel, Node.js, REST API, Apache
Frontend & UX	JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Responsive Web Design
Database & Analytics	MySQL, SQL, Data Analytics Essentials (SQL, Excel, Tableau)
Security & DevOps	Git/GitHub, Certified Ethical Hacker (CEH), Vulnerability Assessment

CONSULTING & COMMUNICATION SKILLS

- **Technical Presentation:** Ability to articulate complex system functionalities and architecture to non-technical stakeholders.

- **Client Needs Analysis:** Strong problem-solving and algorithmic thinking used to quickly identify requirements and design appropriate technical solutions.

- **Team Collaboration:** Proven success working cross-functionally within development teams and across internal departments.

- **Adaptability & Planning:** Strategic planning, time management, and a high degree of adaptability to dynamic project requirements.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Engineering
Wesleyan University-Philippines | Mabini Ext., *Cabanatuan City | Graduated: August 2025*

Professionalism (US English) – Wadhwani Foundation
Issued Apr 2025

Start-up Mindset (US English) – Wadhwani
Foundation
Issued Apr 2025

Certified Data Center Technician (CDCT) – East West
International Educational Specialists, Inc.
Issued Nov 2024

Certified Ethical Hacker (CEH) – Cisco
Issued Nov 2024

Python Essentials 1 – Cisco
Issued Nov 2024

Data Analytics Essentials – Cisco
Issued Oct 2024

Introduction to Data Science – Cisco
Issued Oct 2024

Introduction to Cybersecurity – Cisco
Issued May 2024
